

Each day, an unseen war is being waged for our souls. This war between good and evil is fought in the realm of ideas. You and I are bombarded with hundred of social media posts, videos, and opinions. In this storm of ideas, our basic Christian beliefs can become buried or blurry. Jesus teaches that precise beliefs lead to heaven or hell. He also teaches that your beliefs will lead you to a life of supernatural power or to a life of stumbling in the dark.

Jesus Loves Me
John Dickerson

No matter how nice a person may be, if they do not believe that Jesus is fully the One True God, then they have not plugged into eternal life or into Jesus' supernatural power in this life. Such people often live a life of religion rather than relationship.

Jesus Loves Me
John Dickerson

I believe there will be a great outpouring through worship right here in the USA. I do not believe that America could sow missionaries for 200 years all around the world and not reap a bountiful harvest. I believe the greatest move of God is right in front of us. As Christians, we need to be prepared for the work God wants to do; we need to be able to cooperate fully with the Holy Spirit as He ushers in His greatest work in these last days.

Worship Without Limits

Philip Renner

Having a Bible foundation is so important in our lives because people are waiting to hear the truth that sets them free. We don't have a lack of technology or an absence of Christian music in our churches today, but we do have a lack of biblical worldview.

So much of what is presented in our churches has been reduced to entertainment with no scriptural accountability and a powerless, formulated message. We need the pure Word of the Bible preached in power and demonstrated by the fire of the Holy Spirit!
